SIGN SYSTEMS INC.

YOUR SOURCE FOR ADA SIGNAGE

PHOTOPOLYMER

PHOTOPOLYMER

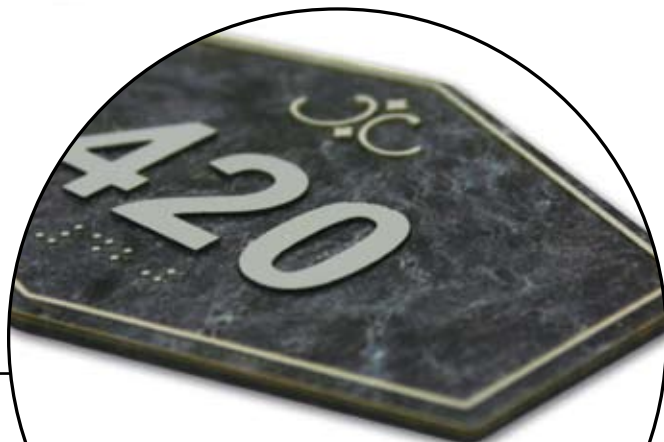

PHOTOPOLYMER

Featuring interior or exterior grade materials, the photopolymer process results in a vandal resistant, one piece sign. Material is available in 1/16", 1/8" and 1/4" thicknesses in addition to .020" and .040" materials for use as inserts in sign frame systems. All materials can be adhered to acrylic providing a wide variety of material thicknesses. Pantone and custom paint matching is available.

Photopolymer signs allow for custom fabrication including clear insert areas, sliding panels, metal accents and special shapes.

Photopolymer signs are produced from a light sensitive material that hardens when exposed to light, providing a one piece integral product. After fabrication an ADA compliant polyurethane paint is applied for a long lasting, durable finish.

CUSTOM SIGNS

Clear polymer can be surface applied to a large selection of laminate wood grains, marbles and granites. Environmentally friendly materials are available in the 3Form Varia series featuring many natural materials such as grass, branches and pebbles.

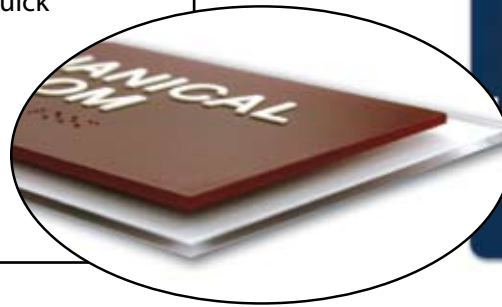

PARK SERIES QUICK SHIP PROGRAM

PARK SERIES QUICK SHIP PROGRAM CUSTOM SIGNS IN 7 BUSINESS DAYS OR LESS

When ADA compliant signs are needed fast, choose the Park Series Quick Ship Program. Available in a variety of sizes, these signs feature 1/8" reverse painted non-glare acrylic, applied raised text and Grade 2 raster-fit Braille. Any pantone or major paint manufacturer's color can be used for the sign background color. Signs are available with square or radius corners and an optional 1/8" clear or frosted acrylic backplate. See www.parkplacesign.com for details and pricing.

STORAGE

STANDARD ACRYLIC

DESIGNER SERIES

The Park Place Designer Series provides a basic, attractive design in a changeable format. A non-glare 1/16" acrylic faceplate is bonded to a 1/8" acrylic backplate with 1/32" foam tape on three sides to allow insertion of a lexan insert. Tactile categories include precision cut acrylic graphics that are chemically bonded to the faceplate. Braille is applied with acrylic rasters friction-fit into cavities drilled into the sign face.

COMPSIGN SERIES

Attractive and functional, Compsign components feature a "sandwich" design comprised of a 1/16" reverse printed acrylic faceplate with a border design to conceal foam tape that is applied to a 1/8" acrylic backplate. The open top design of the completed sign enables the insertion of a lexan insert with applied vinyl.

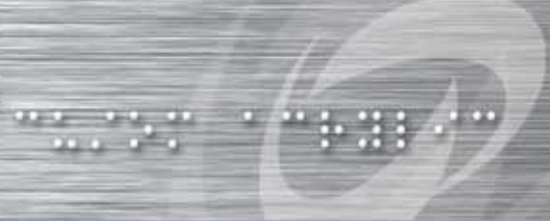

Designer Series

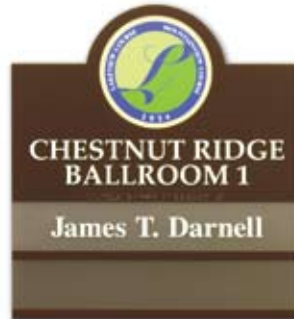

Compsign Series

CUSTOM ACRYLIC

The possibilities are endless with custom acrylic signs. Combine custom materials, standoffs, painting, screen printing and digital printing to produce attractive and interesting signs at reasonable prices. Custom fabricated metals, plastic or metal frames are also available.

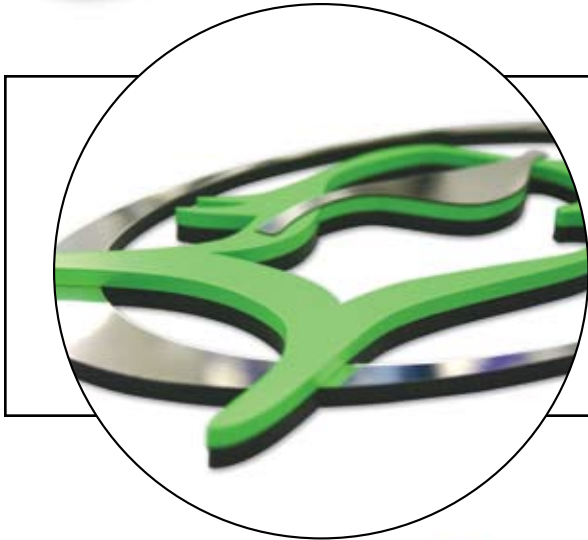

DIRECTORIES

Directories are custom manufactured using many techniques for changeability. Information inserts or slats can use magnetic, sliding or standoff mounting methods.

Dimensional logos and letters are available in many thicknesses of acrylic and PVC materials. Products can be painted or finished with metal or plastic laminated materials. Fabrication processes include both laser cut or CNC router cut finishes.

ABOUT PARK PLACE

In business since 1980, Park Place has provided signage products that can be found in healthcare facilities, educational facilities, office buildings and many other buildings across the country. Complete manufacturing and finish capabilities enable Park Place to provide high quality interior and exterior products. We take pride in our ability to provide quality products, quickly, on your terms.

The reason for our success is simple:
Price • Quick Delivery • Flexibility

Our experience in many types of wayfinding, building and construction projects enables us to provide innovative solutions for your interior sign project. Assistance regarding ADA requirements is available. Please see our website for American With Disabilities Act (ADA) information.

At Park Place we are committed to excellence. Providing great products with great service assures your satisfaction.
